

# Health Net Medicare Part D 2012 Classic Formulary (List of Covered Drugs)

**PLEASE READ: THIS DOCUMENT CONTAINS INFORMATION ABOUT THE DRUGS WE COVER IN THIS PLAN AS OF SEPTEMBER 1, 2011.**

**Note to existing members:** This formulary has changed since last year. Please review this document to make sure that it still contains the drugs you take. To get updated information about the drugs covered by Health Net, please visit our website at [www.healthnet.com](http://www.healthnet.com).

Beneficiaries must use network pharmacies to access their prescription drug benefit. Benefits, formulary, pharmacy network, premium and/or copayments/coinsurance may change on January 1, 2013.

Welcome to Health Net. We are glad you have chosen us to be your plan of choice for your prescription needs. This easy-to-read formulary provides you with valuable information about the formulary (also known as a “drug list”) that applies to your benefit, the prescription drugs we cover, copayment or coinsurance levels and details on how to use your benefit. To quickly find your drug, turn to the index at the end of this booklet. For detailed information on how to read the formulary, turn to page ix.

*What is the Health Net Medicare Part D formulary?*

This formulary represents the entire list of Part D drugs covered by Health Net. A formulary is a list of covered drugs selected by Health Net in consultation with a team of health care providers, which represents the prescription therapies believed to be a necessary part of a quality treatment program. Health Net will generally cover the drugs listed on the formulary as long as the drug is medically necessary, the prescription is filled at a Health Net network pharmacy, and other plan rules are followed. For more information on how to fill your prescriptions, please review your Evidence of Coverage (EOC).

*Which Health Net Medicare Part D formulary applies to you?*

This document contains detailed information for one of Health Net’s formularies. The name of the formulary appears on the front cover of this document. To confirm you are viewing the formulary that applies to your benefit, locate your plan name or type in the table below. If you are not sure of your plan name, you can find it on your EOC.

<i>Plan</i>	<i>Formulary</i>
Health Net Orange Option 1 (PDP)	Value
Health Net Value Orange Option 2 (PDP)	Formulary
Health Net Orange Option 2 (PDP)	Classic
All MAPD Medical Plans (HMO, PPO, and POS)	Formulary

*Can the formulary change?*

Generally, if you are taking a drug on the 2012 formulary that was covered at the beginning of the year, we will not discontinue or reduce coverage of the drug during the 2012 coverage year **except** when a new, less expensive generic drug becomes available and is offered at a lower tier or lower cost to you, or when new information about the safety or effectiveness of a drug is released.

In most cases, formulary changes such as applying a new or revised restriction to a drug, moving a drug to a more expensive tier or removing a drug from the formulary, will not affect you if you are currently taking the drug. The drug will remain available at the same cost for the remainder of the year. We feel it is important that you have continued access for the remainder of the year to the formulary drugs that were available when you chose our plan.

However, in some cases, these types of formulary changes may affect you. If a formulary change will affect you, we will notify you in advance of the change. You will receive notification at least 60 days before the change becomes effective, or you may receive a 60-day supply when you request a refill of the drug which will act as your notification. If we make any non-maintenance formulary changes during the year, you will be notified via mail and the changes will be posted on our website.

If the United States Food and Drug Administration (FDA) deems a drug on the formulary to be unsafe or if the manufacturer of the drug removes the drug from the market, we will immediately remove the drug from the formulary and provide notice to you if you are currently receiving the drug.

To get the most up-to-date information about the drugs covered by Health Net, please visit our website at [www.healthnet.com](http://www.healthnet.com) where you may view and print a formulary. You may also call our Customer Service department at the toll-free number listed at the beginning of this booklet.

### *What if my drug is not on the formulary?*

If your drug is not included on the formulary, you should first contact Customer Service and ask if your drug is covered. If you learn that Health Net does not cover your drug, you have two options:

- You can ask Customer Service for a list of similar drugs that are covered by Health Net. When you receive the list, show it to your prescriber and ask him or her to prescribe a similar drug that is covered by Health Net.
- You can ask Health Net to make an exception and cover your drug. See “How do I request an exception to the Health Net Medicare Part D formulary?” for information about how to request an exception.

### *Are there any restrictions on my coverage?*

Some drugs may have additional restrictions or limits on coverage. You can find out if your drug has any restrictions or limits by looking in the Limits column on the formulary.

The table below provides a description of abbreviations that may appear in the Limits column on the formulary:

<i>Abbreviation</i>	<i>Definition</i>	<i>Description</i>
AL	Age Limit	Some drugs may require prior authorization if your age does not meet manufacturer, FDA, or clinical recommendations.
B/D	Medicare Part B vs. Part D	Some drugs require prior authorization to determine coverage under the Medicare Part B or Part D benefit, according to Medicare guidelines. Your prescriber may need to supply additional information, which will allow Health Net to make the determination. If the drug qualifies for coverage under Medicare Part B and you do not have Medicare Part B coverage through Health Net, the drug will not be covered by Health Net.
GL	Gender Limit	Some drugs are only covered for males or females based on manufacturer, FDA, or clinical recommendations.

LA	Limited Access	<p>Some drugs may be subject to limited access or restricted access. This means that a drug may only be available at one or a limited number of pharmacies. Limited access may be due to the following reasons:</p> <ul style="list-style-type: none"> <li>• The FDA has restricted distribution of a drug to certain facilities, pharmacies or prescribers, or</li> <li>• Certain drugs require special handling, coordination of care, or patient education that cannot be provided at a retail pharmacy.</li> </ul> <p>You should talk to your prescriber or pharmacist for details about acquiring limited access drugs.</p>
MO	Mail Order	<p>These drugs are available at Health Net's network mail order pharmacy in addition to other network pharmacies.</p>
PA	Prior Authorization	<p>Some drugs require prior authorization for coverage, clinical effectiveness, or safety reasons. This means that you or your prescriber must request approval from Health Net before the drug will be covered.</p>
QL	Quantity Limit	<p>For some drugs, Health Net limits the amount of the drug covered based on manufacturer, FDA, clinical dosing or treatment recommendations.</p> <p>This may replace your standard days supply limit.</p>

ST	Step Therapy	<p>In some cases, Health Net requires you to first try certain drugs to treat your medical condition before covering another drug for that condition.</p> <p>For example, if Drug A and Drug B both treat your medical condition, Health Net may not cover Drug B unless you try Drug A first. If Drug A is found in your recent Health Net prescription claims history, Drug B will be automatically approved.</p>
----	--------------	---

You can ask Health Net to make an exception to these restrictions or limits. See the next section.

### *How do I request an exception to the Health Net Medicare Part D formulary?*

You can ask Health Net to make an exception to our coverage rules. There are several types of exceptions that you can ask us to make.

- You can ask us to cover your drug even if it is not on the formulary.
- You can ask us to waive coverage restrictions or limits on your drug. For example, for certain drugs, Health Net may limit the amount of the drug that will be covered. If your drug has a quantity limit, you can ask us to waive the limit and cover more.
- You can ask us to make an exception and cover your drug at a lower tier. If your drug is on Tier 3 (Non-preferred Brand Tier) or on Tier 4 (Injectable Tier), you can ask us for an exception to cover it

for the Tier 2 (Preferred Brand Tier) copayment. Please note, if we grant your request to cover a drug that is not on the formulary, the drug will be available for the Tier 3 (Non-preferred Brand Tier) copayment. The drug is not eligible for an exception for payment at a lower tier. Also, drugs on Tier 2 (Preferred Brand Tier) and Tier 5 (Specialty Tier) are not eligible for an exception for payment at a lower tier.

Generally, Health Net will only approve your request for an exception if preferred alternative drugs or utilization restrictions would not be as effective in treating your condition and/or would cause you to have adverse medical effects.

You may contact us to request an exception. When requesting an exception, we require a statement from your prescriber supporting your request. Generally, we must make our decision

within 72 hours of receiving your prescriber’s supporting statement. You or your prescriber may request an expedited (fast) exception if you or your prescriber believe that your health could be seriously

harmed by waiting up to 72 hours for a decision. If your request to expedite is granted, we must give you a decision no later than 24 hours after we receive your prescriber’s supporting statement.

### *Formulary tier descriptions*

To determine how much you will be required to pay for a drug, the abbreviations in the table below appear in the Brand Tier and Generic Tier columns on the formulary. The copayment or coinsurance level you will be required to pay is displayed in the Copayment/Coinsurance column. If you do not know your copayment or coinsurance for each tier, please refer to your Summary of Benefits or EOC.

<i>Abbreviation</i>	<i>Copayment/ Coinsurance</i>	<i>Description</i>
1	Tier 1 copayment	Preferred generic drugs.
2	Tier 2 copayment	Preferred brand drugs.
3	Tier 3 copayment	Non-preferred brand drugs.
4 (Injectable Tier)	Tier 4 copayment or coinsurance	Includes injectable drugs that do not meet the Centers for Medicare and Medicaid Services (CMS) minimum cost threshold required to be placed on the Specialty Tier (Tier 5). These drugs may be limited to a maximum 30-day supply per fill.
5 (Specialty Tier)	Tier 5 copayment or coinsurance	High cost drugs. Some of these drugs may be limited to a maximum 30-day supply per fill. Specialty Tier (Tier 5) drugs are not eligible for exceptions for payment at a lower tier.
NF	Non-formulary – If Health Net approves an exception request for a non-formulary drug, the Non-preferred Brand Tier (Tier 3) copayment will apply.	Drugs not covered on Health Net’s Medicare Part D formulary. You may request an exception from Health Net to cover these drugs. See the section, “How do I request an exception to the Health Net Medicare Part D formulary?” for information about how to request an exception.

### *How do I use the formulary?*

The drugs in this formulary are grouped into Therapeutic Category and Therapeutic Class Name. If you know what your drug is used for, look for the category or class name which is listed alphabetically. For example, drugs used to treat depression are listed under the category, ANTIDEPRESSANTS.

The index at the end of this booklet provides an alphabetical list of all of the drugs included in the formulary. Both brand name drugs and generic drugs are listed in the index. Next to the drug, you will see the page number where you can find coverage information.

### *How do I read the formulary?*

If you have trouble finding a drug, turn to the index at the end of this booklet.

### *Brand and generic drugs*

Health Net covers both brand name drugs and generic drugs. A generic drug is approved by the FDA as having the same active ingredient as the brand name drug. Generally, generic drugs cost less than brand name drugs.

The name of each drug can be found in the first column. Brand name drugs are in uppercase (example: ZOCOR) and generic drugs are in lowercase (example: simvastatin). When there is a brand name drug with a generic equivalent available, the drugs will be listed on the same line with the generic drug in parentheses, for example: ZOCOR (simvastatin).

### *Tier status*

The tier status is shown to the right of the drug name. Generally, when there is a brand name drug with a generic equivalent available, the brand name drug will be non-preferred or non-formulary.

## Limits

The information in the Limits column tells you if there are any limits or restrictions on a drug. For a complete description of abbreviations found in the Limits column, please refer to the Abbreviations table beginning on page v.

*Note: Example only*

<i>BRAND DRUG (generic drug)</i>	<i>Brand Tier</i>	<i>Generic Tier</i>	<i>Limits</i>
Therapeutic Category Name			
Therapeutic Class Name -			
BRAND NAME (generic name)	3	1	B/D, MO, PA, QL •
• BRAND NAME	2		LA, ST

Brand drug only; generic not available

Sample of abbreviations; Turn to pages v – vii for a complete description of abbreviations

### *Health Net's transition program*

The transition program is designed to ensure continuity of care for new members, existing members who may be subject to formulary changes, and members who experience a level of care change. The program also allows members in Long Term Care (LTC) facilities access to a temporary transition supply of drugs.

### *Initial eligibility*

If you are a new member in our plan, you may be taking drugs that are not on the formulary, or you may be taking a drug that is on the formulary with restrictions or limits. For example, you may need a prior authorization from us before your prescription can be filled. You should talk to your prescriber to decide if you should change to a drug that we cover or request an exception so that we will cover the drug you take. While you talk to your prescriber to determine the right course of action for you, we may cover

your drug in certain cases during the first 90 days you are a member of our plan. This may also apply if you are a renewing member and experience a change in the formulary at the beginning of the contract year. During this time, if your drug is not on the formulary or if your ability to get your drug is limited, we will cover a one-time temporary 30-day transition supply (unless you have a prescription written for fewer days) when you go to a network pharmacy. If your prescription is written for less than a 30-day transition supply, refills for up to a cumulative 30-day supply will be covered.

If you are a resident of a LTC facility, we will cover a temporary 34-day transition supply (unless you have a prescription written for fewer days). We will allow you to refill your prescription until we have provided you with a 102-day transition supply, consistent with the dispensing increment, (unless you have a prescription written for fewer days).

### *Emergency supply*

If you are a resident of an LTC facility and need a drug that is not on the formulary or your ability to get your drug is limited, but you are past the first 90 days of membership in our plan, we will cover a 34-day emergency supply of that drug (unless you have a prescription written for fewer days) while you pursue an exception.

### *Level of care changes*

If you experience a level of care change, we will cover a transition supply of your drugs. A level of care change occurs when you are discharged from a hospital or moved to or from a long-term care facility.

- If you move from a LTC facility or a hospital to home and need a transition supply right away, we will cover one 30-day supply, or less if your prescription is written for fewer days (in which case we will allow multiple fills to provide up to a total of a 30-day supply of medication).
- If you move from home or a hospital to a long-term care facility and need a transition supply right away, we will cover one 34-day supply, or less if your prescription is written for fewer days (in which case we will allow multiple fills to provide up to a total of a 34-day supply of medication).

### *For more information*

For more detailed information about your Health Net prescription drug coverage, please review your EOC and other plan materials.

If you have questions about Health Net, please call our Customer Service department at the toll-free number listed at the beginning of this booklet, or visit [www.healthnet.com](http://www.healthnet.com).

If you have general questions about Medicare prescription drug coverage, please call Medicare at 1-800-MEDICARE (1-800-633-4227) 24 hours a day/7 days a week. TTY/TDD users should call 1-877-486-2048. Or, visit [www.medicare.gov](http://www.medicare.gov).
